

SEAN HATHAWAY

SOFTWARE ENGINEER

Profile

In my profession, with years vast and wide, my expertise and earned wisdom are my goals to provide. Alone or in teams, success I have seen, In every endeavor, I'm focused and keen.

Proficient in results, my goals never bend, to improve and to grow is the message I send. Innovative in thought, to challenges I rise. With eyes on new tech, advancement's the prize.

Learning's my journey, design is my bridge, with ethics held high, my knowledge I pledge. Analytical in mind, with diligence so true, In a world full of pros, I stand among few.

Employment History

Owner and Creative Technologist, SHLabs, Portland, Oregon

JANUARY 2010 – PRESENT

- In meeting both time and cost, clients found delight, setting expectations real, made projects just right.
- From start to end, I led the product's creation, from resources, materials, and underlying foundations.
- Visit SHLaboratories, to see works refined, a portfolio awaits, showcasing recent designs.

Director of Engineering, Pink Noise Projects, Portland, Oregon

NOVEMBER 2021 – NOVEMBER 2022

- In-house tools were my savvy creation, saving clients and orgs, quite a bit of frustration. Migration of Salesforce data so grand, and with minimal downtime, thanks to my hand.
- Engineering policies, and standards refined, in line with core principles, cleverly designed. Selecting the tech, resources quite prime, for communication, and staying ahead of short time.
- Selection of tech for us to procure, I set up tools, with success to ensure. Slack to JIRA, each software in place, For agile based projects and chat's lively pace.

Senior Software Engineer, Symbeo, A CorVel Company, Portland, Oregon

JANUARY 2005 – APRIL 2020

- In ten years' span, \$6 Mil I did save, Through automation, this course I did pave.
- For medical claims, a system I spun, adjudication and more, by the time I was done. Thousands of hours, without purpose I cleared, with a framework so grand, that the standard appeared.
- Manual tasks, with costs ever so steep, were replaced with automation's savings ever so deep.

Education

B.S. Astrophysics, New Mexco Tech, Socorro, New Mexico

B.S. Coursework Physics, PSU, Portland, Oregon

A.A. Commercial Pilot Certification, Mt Hood C.C., Portland, Oregon

Community Service and Mentorship

Coding and Robotics Club Advisor, Sunnyside Environmental K-8, Portland, Oregon

NOVEMBER 2022 – PRESENT

- In after-school sessions, robotics was the hub, with coding and micro-controllers, I'd set up the club.
- I crafted the courses, workshops, and reports, giving each student vast individualized support.

Volunteer/Artist, Portland Winter Lights Festival (PDXWLF), Portland, Oregon

FEBRUARY 2018 – PRESENT

- In lighting and fire, my artworks do shine, For groups and lone ventures, each design was mine.
- I guided young and old, to the crafts they'd delight, with creative endeavors, visions I helped come to light.

Curator, AFRU Gallery, Portland, Oregon

JANUARY 2010 – PRESENT

- In a non-profit gallery where experimental art glows and blaze, I curated a show for quite a few days. For local coders and artists to have stake, the platform was theirs, for the world to partake.
- In Portland's tech, where creativity stands tall, I fostered mentorship, and social networking for all.
